Jean J. Schensul and Margaret D. LeCompte

Essential ethnographic methods: a mixed methods approach

CONTENTS

List of Tables and Figures ix
List of Examples xi
Introduction to the Ethnographer's Toolkit xvi

Chapter 1 Essential Data Collection 1
What Is Essential Data Collection? 1
Why Are Research Questions Required to
Guide Essential Data Collection? 2
The Value of Research Modeling Based on
Research Questions and Prior Knowledge 5
Basic Skills Required in Essential Data Collection 8
Establishing Professional Boundaries: Intimacy and
Relationships in Face-to-Face Data Collection 17
Summary: Challenges in Collecting Observational
and Interview Data in Person 20

Chapter 2 Defining and Entering the Field 22
Fieldwork and the Field 23
The Ethnographer as Self-Reflective Tool for Inquiry 26
Establishing Relationships to Facilitate Entry 32
Steps in Entering a Research Setting 32

Chapter 3 Recording and Organizing Ethnographic
Field Data: Field Notes, Interviews, Drawings,
Visual Documentation, and Survey Data 47
What Are Field Notes, and Why Are They Important? 47
Recording Field Notes 54
Writing Up Field Notes 56
Making Decisions about What to Write 60
Organizing and Managing Ethnographic Data While
in the Field 78
Storing Quantitative Data for Subsequent Analysis 81
Summary 82
### Chapter 4  Participant Observation and Informal Interviewing in the Field

<table>
<thead>
<tr>
<th>Section</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introduction</td>
<td>83</td>
</tr>
<tr>
<td>Differences between Participant Observation and Nonparticipant Observation</td>
<td>84</td>

</table>
Sampling in Semistructured Data Collection 191
Identifying and Resolving Challenges in Semistructured Data Collection 193
Summary 194

Chapter 8 Focus Group Interviews 195
What Is a Group Interview? 195
Formal Focus Group Interviews 196
Organizing and Preparing for Formal Focus Group Interviews 198
Creating a Representative Sample for a Focus Group 202
Identifying and Training Focus Group Facilitators 211
Conducting a Focus Group Interview 216
Asking Questions in Focus Group Interviews 220
Characteristics of Good Focus Group Questions 222
Recording Data from Focus Group Interviews 226
Videotaping 231
Validity and Reliability in Research with Focus Groups 233
Management and Analysis of Focus Group Interviews 237
Advantages, Uses, and Limitations of Focus Group Interviews 239

Chapter 9 Structured Approaches to Ethnographic Data Collection: Surveys 241
The Role of Structured Data Collection 241
Defining Ethnographic Surveys 243
Steps in the Construction of the Ethnographic Survey 247
Administration of Ethnographic Interviews 271
Analysis of Quantitative Data 275
Integrating Qualitative and Quantitative Data: Triangulation 276
Summary 278

Chapter 10 Sampling in Ethnographic Research 280
Approaches to Selection in Ethnographic Research 283
Approaches to Sampling to Approximate or Achieve Representativeness of a Population in Ethnographic Research 294
Requirements for and Cautions about the Use of Samples 309
Summary 318
# LIST OF TABLES AND FIGURES

- **Figure 1.1:** Domain Model: Predictors of Somali Students’ Educational Performance  
  - Page: 5

- **Table 1.1:** Hypotheses Linking Independent Domains in the Research Model to the Dependent Domain—Somali Children’s School Performance  
  - Page: 6

- **Table 1.2:** Unpacking Domains in a Research Model to Guide Data Collection  
  - Page: 7

Table 9.3: Question Format Table, with Examples 267
Table 9.4: Different Ways of Formatting Variables for the Factor "Family Income" 268
Table 10.1: Selection Frame for Respondents in Mauritius Study 295
LIST OF EXAMPLES

1.1: Developing a script for use in a study of HIV and alcohol use in India 9
1.2: Modifying a script to introduce an alcohol- and sexual-risk study to key people in the community 10
1.3: Meeting people knowledgeable about smokeless tobacco use in Mumbai 14

2.1: Accessing fieldwork sites in rural Mexico 34
2.2: Accessing shantytowns in a field site in the northwest sector of Lima 35
2.3: When the ethnographer's ethnicity eases entry to the field 36
2.4: Confirming perceptions of racism in an urban high school 42

3.1: Writing field notes on the culture, context, and lifestyle of young adults 49
3.2: Field notes from the beginning of school in an experimental school-community partnership project 51
3.3: Inscribing information on arts instruction in the Arts Focus study 64
3.4: Emergent substudy of tobacco outlets in a study of smokeless tobacco use and reproductive health in Mumbai 65
3.5: Transcript from an interview with a sixth-grade male Arts Focus student, aged about eleven 69
3.6: Transcribing in-depth interviews with young violinists 71
3.7: Transcript for April 2, 1997, 3:05 p.m., large group for Arts Focus 73
3.8: Transcript from LeCompte's field notes, October 4, 1996; 1:10 p.m., Third Block, Theater Arts class, sixth and seventh graders (ages eleven to fourteen) 75

4.1: From nonparticipation to full immersion in a weaving cooperative 85
4.2: The "walkabout" in the earliest stages of a field experience 89
4.3: Doing a "walkabout" to map the community and meet key informants  

4.4: Observing downtown clubs and bars from a distance  

4.5: Identifying street sites where teenagers gather  

4.6: Locating health care sites in Pueblos Jovenes (new communities) in Lima, Peru  

4.7: Places in Port Louis where young adults socialize  

4.8: Treating for abusive alcohol use at a spiritualist center  

4.9: Observing differences in homesteads in a rural rice-growing area of Sri Lanka  

4.10: Observation of an annual event, the Esala Perahera  

4.11: An informal group interview in a clinic setting  

4.12: Interviewing a group of village physicians in rural China  

4.13: Taking advantage of an opportunity to interview a group of residents in senior housing about oral health concerns  

5.1: Using social mapping to obtain information about accessibility to reproductive health care  

5.2: Mapping bars and restaurants in a central downtown area  

5.3: Combining the mapping of smokeless tobacco outlets in Mumbai with interviews  

5.4: Using a Geographic Information System (GIS) to introduce children to social mapping  

5.5: Mapping the hustling of products in a northeastern city  

5.6: When mapping through observation was too dangerous to undertake  

5.7: Eliciting cultural-level experiences and perceptions of the use of MDMA (Ecstasy)  

5.8: Using an ecological model for teaching risk-avoidance strategies to sixth graders  

5.9: Using social-mapping strategies in a study of young women's evening activities
LIST OF EXAMPLES

5.10: Using personal timelines to determine turning points in the developing career of musicians 129

6.1: Exploring pathways to hard drug use among young adults 137
6.2: Exploring the context of male-female relationships among youth and young adults in Mauritius 138
6.3: Conducting interviews with Mina's grandmother 151
6.4: A narrative account of entry into drug use 156
6.5: Transition from student to career violinist 158

7.1: A data matrix summarizing narrative interviews on the use of the drug Ecstasy 173
7.2: Confirming domains and identifying factors in a study of AIDS risk in Mauritius and Sri Lanka 176
7.3: Administration of a semistructured interview 182
7.4: Healthy food: The moral realm of kindergarten school lunch boxes 189

8.1: Deciding whom to include in conducting focus groups on diabetes with Latino adults 201
8.2: Focus group with children and adults to identify daily activities 201
8.3: Focus groups with Latinos about HIV 205
8.4: Focus groups with university students in Sri Lanka exploring knowledge of how HIV/AIDS is contracted 206
8.5: Training nonethnographers to conduct focus groups 213
8.6: Focus groups with middle school children in Sri Lanka 214
8.7: Questions organizing a focus group discussion on Alzheimer's disease for health care providers of Puerto Rican clients 221
8.8: Using free lists to determine differences in definitions of violence in a community 223
8.9: Using maps as a stimulus for group discussion with children 225
8.10: Using group interviews to differentiate degrees of sex risk 226
8.11: Problems when outside transcribers decide what is relevant to transcribe
8.12: Focus group discussions on perceptions of family planning
8.13: Focus groups on reproductive health in Mauritius
8.14: Problems in sampling for focus group interviewing

9.1: Extracting factors and variables from unstructured and semistructured interview data
9.2: Examples of exhaustiveness in item selection in the construction of closed-ended responses on an ethnographic survey
9.3: A poorly formatted question regarding employment
9.4: Relationship between variables and items
9.5: Using self-administered questionnaires with university students in Sri Lanka
9.6: Using self-administered questionnaires with mothers and daughters in Hartford
9.7: Integrating qualitative and quantitative data in a study of women, work, and AIDS in Mauritius

10.1: Identifying key informants or local experts
10.2: Studying potential dropouts in Pinnacle
10.3: Using quota sampling to study sexual risk behaviors in Mauritius
10.4: Targeted sampling of injection drug users
10.5: Using a targeted sampling plan and chain referral approaches to sample hard-to-find youthful substance abusers
10.6: Using a stratified cluster sampling design to study compliance with requirements for identifying language-minority students
10.7: Sampling “three-wheel drivers” in Sri Lanka
10.8: Sampling household units in a multiethnic neighborhood
10.9: Interviewing agency staff on drug use of adolescents
10.10: Interviewing factory-floor supervisors on opportunities for social interaction between unmarried men and women
LIST OF EXAMPLES

11.1: Negative subjectivities lead a researcher to avoid contact with a key participant 322
11.2: Positive subjectivities in choice of research sites and topics 323
11.3: Conducting mixed- and same-gender focus groups on male-female relationships with young Sri Lankan adults 330
11.4: Competing explanations for "trouble" in a school district 338
