CHAPTER 1  INTRODUCING PSYCHOLOGY’S HISTORY  1
Psychology and Its History  2
Why Study History?  4
Why Study Psychology’s History?  7
Key Issues in Psychology’s History  8
Old Versus New History  9
Presentism Versus Historicism  9
Internal Versus External History  11
Personalistic Versus Naturalistic History  13
Close-Up: Edwin G. Boring (1886-1968)  14
This Book’s Point of View  16
Historiography: Doing and Writing History  17
Sources of Historical Data  18
Problems with the Writing of History  20
Data Selection Problems  20
Interpretation Problems  22
Approaching Historical Truth  24

CHAPTER 2  THE PHILOSOPHICAL CONTEXT  28
A Long Past  29
Descartes: The Beginnings of Modern Philosophy and Science  30
Descartes and the Rationalist Argument  31
The Cartesian System: Rationalism, Nativism, and Mechanistic Interactionism  33
Descartes on the Reflex and Mind-Body Interaction  34
The British Empiricist Argument and the Associationists  37
John Locke (1632-1704): The Origins of British Empiricism  38
Locke on Human Understanding  38
Locke on Education  42
George Berkeley (1685-1753): Empiricism Applied to Vision  43
British Associationism  46
David Hume (1711-1776): The Rules of Association  46
David Hartley (1705-1757): A Physiological Associationism  48
Close-Up: Raising a Philosopher  50
John Stuart Mill (1806-1873): On the Verge of Psychological Science  51
Mill’s Psychology  52
Mill’s Logic  54
Rationalist Responses to Empiricism  55
Gottfried Wilhelm Leibniz (1646-1716)  56
Immanuel Kant (1724-1804)  57
In Perspective: Philosophical Foundations  58

CHAPTER 3  THE PHYSIOLOGICAL CONTEXT: EARLY RESEARCH ON THE NERVOUS SYSTEM  62
Heroic Science in the Age of Enlightenment  63
Functioning of the Nervous System  64
Reflex Action  65
The Bell-Magendie Law  66
The Specific Energies of Nerves  68
Helmholtz: The Physiologist’s Physiologist  69
Measuring the Speed of Neural Impulses  70
Helmholtz on Vision and Audition  71
Helmholtz and the Problem of Perception  73
Localization of Brain Function  75
The Phrenology of Gall and Spurzheim  75
Close-Up: The Marketing of Phrenology  79
Flourens and the Method of Ablation  81
The Clinical Method  82
The Remarkable Phineas Gage  82
Broca Discovers the Speech Center  83
Mapping the Brain: Electrical Stimulation  85
Early Twentieth-Century Studies of the Nervous System and Behavior  87
Neuron Theory  87
Sir Charles Sherrington: The Synapse  89
Karl Lashley: Learning and the Cortex  90
Equipotentiality and Mass Action  91
In Perspective: The Nervous System and Behavior  94
CHAPTER 4  WUNDT AND GERMAN
PSYCHOLOGY  98

An Education in Germany  99
On the Threshold of Experimental Psychology:
Psychophysics  100
   Ernst Weber (1795-1878)  101
   Two-Point Thresholds  101
   Weber's Law  101
   Gustav Fechner (1801-1889)  103
   Fechner's Elements of Psychophysics  105
Wundt Establishes a New Psychology at Leipzig  107
   Wilhelm Wundt (1832-1920): Creating a New Science  107
   Wundt's Conception of the New Psychology  110
   Studying Immediate Conscious Experience  110
   Studying Higher Mental Processes  111
   Inside Wundt's Laboratory  112
   Sensation and Perception  112
   Mental Chronometry  113
Close-Up: An American in Leipzig  116
   Rewriting History: The New and Improved Wilhelm Wundt  117
      The Source of the Problem  118
      The Rediscovery of Wundt  118
      The Real Wundt  119
   The Wundtian Legacy  120
The New Psychology Spreads  120
   Hermann Ebbinghaus (1850-1909): The Experimental Study of Memory  120
   Other Contributions by Ebbinghaus  125
   G. E. Müller (1850-1934): The Experimentalist Prototype  125
   Oswald Külpe (1862-1915): The Würzburg School  127
      Mental Sets and Imageless Thoughts  128
In Perspective: A New Science  129

CHAPTER 5  DARWIN’S CENTURY: EVOLUTIONARY THINKING  132

The Species Problem  133
Charles Darwin (1809-1882) and the Theory of

      The Shaping of a Naturalist  135
      The Voyage of the Beagle  136
      Darwin the Geologist  137
      Darwin the Zoologist  138
      The Galápagos Islands  138

The Evolution of Darwin’s Theory  139
   Darwin's Delay  142
   Elements of the Theory of Evolution  144
   After the Origin of Species  145
   Darwin and Psychology’s History  147
The Origins of Comparative Psychology  148
   Darwin on the Evolution of Emotional Expressions  148
Close-Up: Douglas Spalding and the Experimental Study of Instinct  150
   George Romanes (1848-1894): The Anecdotal Method  152
   Conwy Lloyd Morgan (1852-1936): The Principle of Parsimony  153
Comparative Psychology in America  155
   Studying Individual Differences  156
   Francis Gallon (1822-1911): Jack of All Sciences  156
      The Nature of Intelligence  157
      The Anthropometric Laboratory  159
      Investigating Imagery and Association  161
In Perspective: Darwin’s Century  162

CHAPTER 6  AMERICAN PIONEERS  166

Psychology in Nineteenth-Century America  167
   Faculty Psychology  167
      American Psychology’s First Textbook  168
   The Modern University  169
      Education for Women and Minorities  170
William James (1842-1910): America’s First Psychologist  174
   The Formative Years  175
   A Life at Harvard  176
   Creating American Psychology’s Most Famous Textbook  178
      On Methodology  179
      Consciousness  180
      Habit  181
      Emotion  181
   James’s Later Years  183
   Spiritualism  184
Summing Up William James  185
   G. Stanley Hall (1844-1924): Professionalizing: the New Psychology  185
      Hall’s Early Life and Education  187
      From Johns Hopkins to Clark  188
      Psychology at Clark  189
Close-Up: Creating Maze Learning  191
Wertheimer on Productive Thinking 305
Other Gestalt Research on Cognition 306
Kurt Lewin (1890-1947): Expanding the Gestalt Vision 308
Early Life and Career 309
Field Theory 310
The Zeigarnik Effect 312
Lewin as Developmental Psychologist 312
Lewin as Social Psychologist 315
Action Research 317
Evaluating Lewin 318
In Perspective: Gestalt Psychology in America 319

CHAPTER 10  THE ORIGINS OF BEHAVIORISM 323

Behaviorism's Antecedents 324
Pavlov's Life and Work 326
The Development of a Physiologist 326
Working in Pavlov's Laboratory 328
Pavlov's Classical Conditioning Research 330
Conditioning and Extinction 331
Generalization and Differentiation 332
Experimental Neurosis 332
A Program of Research 333
Pavlov and the Soviets 334
Pavlov and the Americans 335
Close-Up: Misportraying Pavlov's Apparatus 335

John B. Watson and the Founding of Behaviorism 337
The Young Functionalist at Chicago 338
The Watson/Carr Maze Studies 339
Opportunity Knocks at Johns Hopkins 341
Watson and Animal Behavior 341
Watson's Behaviorist Manifesto 342
Watson's APA Presidential address 344
Studying Emotional Development 345
The Zenith and the Nadir of a Career: Little Albert 346
A New Life in Advertising 350
Popularizing Behaviorism 352
Evaluating Watsonian Behaviorism 353
In Perspective: Behaviorism's Origins 354

CHAPTER 11  THE EVOLUTION OF BEHAVIORISM 358

Post-Watsonian Behaviorism 359
Logical Positivism and Operationism 360
Neobehaviorism 362
Edward C. Tolman (1886-1959): A Purposive Behaviorism 364
Tolman's System 365
Molar Versus Molecular Behavior 366
Goal-Directedness 366
Intervening Variables 367
Tolman's Research Program 369
Latent Learning 369
Cognitive Maps 371
Evaluating Tolman 373

Clark Hull (1884-1952): A Hypothetico-Deductive System 375
Hull's System 378
Postulate 4: Habit Strength 379
Reaction Potential 380
Evaluating Hull 380

The Experimental Analysis of Behavior 384
Operant Conditioning: A Primer 385
Skinner and Theory 388
Skinner and the Problem of Explanation 389
A Technology of Behavior 391
Close-Up: A Skinnerian Utopia 392
Evaluating Skinner 393
In Perspective: Neobehaviorism 394

CHAPTER 12  MENTAL ILLNESS AND ITS TREATMENT 399

Early Treatment of the Mentally Ill 400
"Enlightened" Reform: Pinel, Tuke, Rush, and Itard 401
Reforming Asylums: Dix and Beers 404
Close-Up: Diagnosing Mental Illness 407
Mesmerism and Hypnosis 408
Mesmerism and Animal Magnetism 408
From Mesmerism to Hypnosis 410
The Hypnotism Controversies 411
Sigmund Freud (1856-1939): Founding Psychoanalysis 414
Early Life and Education 415
Breuer and the Catharsis Method 416
Creating Psychoanalysis 418
The Importance of Sex 420
Psychoanalysis Enters the Twentieth Century 421
The Evolution of Psychoanalytic Theory 422
Freud's Followers: Loyalty and Dissent 424
KEY DATE BOXES-DATE SUMMARY

Chapter 2 1843 (Mill's Logic) 53
Chapter 3 1861 (Broca's "Tan") 85
Chapter 4 1879 (Wundt's lab) 109
Chapter 5 1859 (Darwin's Origin) 143
Chapter 6 1890 (James's Principles) 179
Chapter 7 1906 (Angell's APA address) 227
Chapter 8 1917 (Army testing program) 270
Chapter 9 1929 (International Yale conference) 313
Chapter 10 1913 (Watson's manifesto) 342
Chapter 11 1953 (Skinner's Science and Human Behavior) 390
Chapter 12 1900 (Freud's dream book) 420
Chapter 13 1949 (Boulder conference) 444
Chapter 14 1932 (Barlett's memory book) 472
