1 Why is my evil lecturer forcing me to learn statistics? 1

1.1. What will this chapter tell me? 1

1.2. What the hell am I doing here? I don’t belong here 1

1.2.1. The research process 1

1.3. Initial observation: finding something that needs explaining 3

1.4. Generating theories and testing them 4

1.5. Data collection 1: what to measure 7

1.5.1. Variables 7

1.5.2. Measurement error 10

1.5.3. Validity and reliability 11

1.6. Data collection 2: how to measure 12

1.6.1. Correlational research methods 12

1.6.2. Experimental research methods 13

1.6.3. Randomization 17

1.7. Analysing data 18

1.7.1. Frequency distributions 18

1.7.2. The centre of a distribution 20

1.7.3. The dispersion in a distribution 23

1.7.4. Using a frequency distribution to go beyond the data 24

1.7.5. Fitting statistical models to the data 26

What have I discovered about statistics? 28
Key terms that I’ve discovered 28
Smart Alex’s stats quiz 29
Further reading 29
Interesting real research 30
## 2 Everything you ever wanted to know about statistics (well, sort of)

<table>

### What have I discovered about statistics?

- Key terms that I've discovered
- Smart Alex's tasks
- Further reading
- Online tutorials

## 4 Exploring data with graphs

<table>
<thead>
<tr>
<th>Section</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1. What will this chapter tell me?</td>
<td>87</td>
</tr>
<tr>
<td>4.2. The art of presenting data</td>
<td>88</td>
</tr>
<tr>
<td>4.2.1. What makes a good graph?</td>
<td>88</td>
</tr>
<tr>
<td>4.2.2. Lies, damned lies, and ... erm ... graphs</td>
<td>90</td>
</tr>
</tbody>
</table>
## 5 Exploring assumptions

### 5.1. What will this chapter tell me?  
5.1.1. What are assumptions?  
5.1.2. Assumptions of parametric data  
5.1.3. The assumption of normality  
5.1.3.1. Oh no, it's that pesky frequency distribution again: checking normality visually  
5.1.3.2. Quantifying normality with numbers  
5.1.3.3. Exploring groups of data  
5.1.4. Testing whether a distribution is normal  
5.1.4.1. Doing the Kolmogorov–Smirnov test on SPSS  
5.1.4.2. Output from the explore procedure  
5.1.4.3. Reporting the K–S test  
5.1.5. Testing for homogeneity of variance  
5.1.5.1. Levene's test  
5.1.5.2. Reporting Levene's test  
5.1.6. Correcting problems in the data  
5.1.6.1. Dealing with outliers  
5.1.6.2. Dealing with non-normality and unequal variances  
5.1.6.3. Transforming the data using SPSS  
5.1.6.4. When it all goes horribly wrong  

What have I discovered about statistics?  
Key terms that I've discovered  
Smart Alex's tasks

6 Correlation

6.1. What will this chapter tell me? 1
6.2. Looking at relationships 1
6.3. How do we measure relationships? 1
   6.3.1. A detour into the murky world of covariance 1
   6.3.2. Standardization and the correlation coefficient 1
   6.3.3. The significance of the correlation coefficient 1
   6.3.4. Confidence intervals for \( r \) 1
   6.3.5. A word of warning about interpretation: causality 1
6.4. Data entry for correlation analysis using SPSS 1
6.5. Bivariate correlation 1
   6.5.1. General procedure for running correlations on SPSS 1
   6.5.2. Pearson’s correlation coefficient 1
   6.5.3. Spearman’s correlation coefficient 1
   6.5.4. Kendall’s tau (non-parametric) 1
   6.5.5. Biserial and point-biserial correlations 1
6.6. Partial correlation 2
   6.6.1. The theory behind part and partial correlation 2
   6.6.2. Partial correlation using SPSS 2
   6.6.3. Semi-partial (or part) correlations 2
6.7. Comparing correlations 3
   6.7.1. Comparing independent \( r \) 3
   6.7.2. Comparing dependent \( r \) 3
6.8. Calculating the effect size 1
6.9. How to report correlation coefficients 1

7 Regression

7.1. What will this chapter tell me? 1
7.2. An introduction to regression 1
   7.2.1. Some important information about straight lines 1
   7.2.2. The method of least squares 1
   7.2.3. Assessing the goodness of fit: sums of squares, \( R \) and \( R^2 \) 1
   7.2.4. Assessing individual predictors 1
7.3. Doing simple regression on SPSS 1
7.4. Interpreting a simple regression 1
   7.4.1. Overall fit of the model 1
   7.4.2. Model parameters 1
   7.4.3. Using the model 1
7.5. Multiple regression: the basics 2
   7.5.1. An example of a multiple regression model 2
   7.5.2. Sums of squares, \( R \) and \( R^2 \) 2
   7.5.3. Methods of regression 2
7.6. How accurate is my regression model? 2
<table>

9 Comparing two means
9.1. What will this chapter tell me?
9.2. Looking at differences
9.2.1. A problem with error bar graphs of repeated-measures designs
9.2.2. Step 1: calculate the mean for each participant
9.2.3. Step 2: calculate the grand mean
9.2.4. Step 3: calculate the adjustment factor
9.2.5. Step 4: create adjusted values for each variable
9.3. The t-test
9.3.1. Rationale for the t-test
9.3.2. Assumptions of the t-test
9.4. The dependent t-test
9.4.1. Sampling distributions and the standard error
9.4.2. The dependent t-test equation explained
9.4.3. The dependent t-test and the assumption of normality
9.4.4. Dependent t-tests using SPSS
9.4.5. Output from the dependent t-test
9.4.6. Calculating the effect size
9.4.7. Reporting the dependent t-test
9.5. The independent t-test
9.5.1. The independent t-test equation explained
9.5.2. The independent t-test using SPSS
9.5.3. Output from the independent t-test
9.5.4. Calculating the effect size
9.5.5. Reporting the independent t-test
9.6. Between groups or repeated measures?
9.7. The t-test as a general linear model
9.8. What if my data are not normally distributed?
10 Comparing several means: ANOVA (GLM 1)

10.1. What will this chapter tell me?  
10.2. The theory behind ANOVA  
  10.2.1. Inflated error rates  
  10.2.2. Interpreting F  
  10.2.3. ANOVA as regression  
  10.2.4. Logic of the F-ratio  
  10.2.5. Total sum of squares (SS_T)  
  10.2.6. Model sum of squares (SS_M)  
  10.2.7. Residual sum of squares (SS_E)  
  10.2.8. Mean squares  
  10.2.9. The F-ratio  
  10.2.10. Assumptions of ANOVA  
  10.2.11. Planned contrasts  
  10.2.12. Post hoc procedures  

10.3. Running one-way ANOVA on SPSS  
  10.3.1. Planned comparisons using SPSS  
  10.3.2. Post hoc tests in SPSS  
  10.3.3. Options  

10.4. Output from one-way ANOVA  
  10.4.1. Output for the main analysis  
  10.4.2. Output for planned comparisons  
  10.4.3. Output for post hoc tests  

10.5. Calculating the effect size  

10.6. Reporting results from one-way independent ANOVA  

10.7. Violations of assumptions in one-way independent ANOVA  

11 Analysis of covariance, ANCOVA (GLM 2)

11.1. What will this chapter tell me?  
11.2. What is ANCOVA?  
11.3. Assumptions and issues in ANCOVA  
  11.3.1. Independence of the covariate and treatment effect  
  11.3.2. Homogeneity of regression slopes  
11.4. Conducting ANCOVA on SPSS  
  11.4.1. Inputting data  
  11.4.2. Initial considerations: testing the independence of the independent variable and covariate
### 13 Repeated-measures designs (GLM 4)

## 14 Mixed design ANOVA (GLM 5)

14.1. What will this chapter tell me? ① 506
14.2. Mixed designs ② 507
14.3. What do men and women look for in a partner? ③ 508
14.4. Mixed ANOVA on SPSS ② 508
   14.4.1. The main analysis ② 508
   14.4.2. Other options ② 513
14.5. Output for mixed factorial ANOVA: main analysis ③ 514
   14.5.1. The main effect of gender ② 517
   14.5.2. The main effect of looks ② 518
   14.5.3. The main effect of charisma ② 520
   14.5.4. The interaction between gender and looks ② 521
   14.5.5. The interaction between gender and charisma ② 523
   14.5.6. The interaction between attractiveness and charisma ② 524
   14.5.7. The interaction between looks, charisma and gender ③ 527
   14.5.8. Conclusions ③ 530
14.6. Calculating effect sizes ③ 531
14.7. Reporting the results of mixed ANOVA ② 533
14.8. What to do when assumptions are violated in mixed ANOVA ③ 536
   What have I discovered about statistics? ② 536

## 15 Non-parametric tests

15.1. What will this chapter tell me? ① 539
15.2. When to use non-parametric tests ① 540
15.3. Comparing two independent conditions: the Wilcoxon rank-sum test and Mann–Whitney test ① 540
   15.3.1. Theory ② 542
   15.3.2. Inputting data and provisional analysis ① 545
   15.3.3. Running the analysis ① 546
   15.3.4. Output from the Mann–Whitney test ① 548
   15.3.5. Calculating an effect size ② 550
   15.3.6. Writing the results ① 550
15.4. Comparing two related conditions: the Wilcoxon signed-rank test ① 552
   15.4.1. Theory of the Wilcoxon signed-rank test ② 552
   15.4.2. Running the analysis ① 554
   15.4.3. Output for the ecstasy group ① 556
   15.4.4. Output for the alcohol group ① 557
   15.4.5. Calculating an effect size ② 558
   15.4.6. Writing the results ① 558
16.8. Reporting results from MANOVA
16.9. Following up MANOVA with discriminant analysis
16.10. Output from the discriminant analysis
16.11. Reporting results from discriminant analysis
16.12. Some final remarks
  16.12.1. The final interpretation
  16.12.2. Univariate ANOVA or discriminant analysis?
16.13. What to do when assumptions are violated in MANOVA

17 Exploratory factor analysis
17.1. What will this chapter tell me?
17.2. When to use factor analysis
17.3. Factors
  17.3.1. Graphical representation of factors
  17.3.2. Mathematical representation of factors
  17.3.3. Factor scores
17.4. Discovering factors
  17.4.1. Choosing a method
  17.4.2. Communality
  17.4.3. Factor analysis vs. principal component analysis
  17.4.4. Theory behind principal component analysis
  17.4.5. Factor extraction: eigenvalues and the scree plot
  17.4.6. Improving interpretation: factor rotation
17.5. Research example
  17.5.1. Before you begin
17.6. Running the analysis
  17.6.1. Factor extraction on SPSS
  17.6.2. Rotation
  17.6.3. Scores
  17.6.4. Options
17.7. Interpreting output from SPSS
  17.7.1. Preliminary analysis
  17.7.2. Factor extraction
  17.7.3. Factor rotation
  17.7.4. Factor scores
  17.7.5. Summary
17.8. How to report factor analysis
17.9. Reliability analysis
  17.9.1. Measures of reliability
  17.9.2. Interpreting Cronbach’s α (some cautionary tales …)
  17.9.3. Reliability analysis on SPSS
  17.9.4. Interpreting the output
17.10. How to report reliability analysis
What have I discovered about statistics? ②
Key terms that I’ve discovered ②
Smart Alex’s tasks ②
Further reading ②
Online tutorial ②
Interesting real research ②

18 Categorical data 686
18.1. What will this chapter tell me? ① 686
18.2. Analysing categorical data ① 687
18.3. Theory of analysing categorical data ① 687
  18.3.1. Pearson’s chi-square test ① 688
  18.3.2. Fisher’s exact test ① 690
  18.3.3. The likelihood ratio ② 690
  18.3.4. Yates’ correction ② 691
18.4. Assumptions of the chi-square test ① 691
18.5. Doing chi-square on SPSS ① 692
  18.5.1. Entering data: raw scores ① 692
  18.5.2. Entering data: weight cases ① 692
  18.5.3. Running the analysis ① 694
  18.5.4. Output for the chi-square test ① 696
  18.5.5. Breaking down a significant chi-square test with standardized residuals ② 698
  18.5.6. Calculating an effect size ② 699
  18.5.7. Reporting the results of chi-square ① 700
18.6. Several categorical variables: loglinear analysis ③ 702
  18.6.1. Chi-square as regression ① 702
  18.6.2. Loglinear analysis ① 708
18.7. Assumptions in loglinear analysis ② 710
18.8. Loglinear analysis using SPSS ② 711
  18.8.1. Initial considerations ② 711
  18.8.2. The loglinear analysis ② 712
18.9. Output from loglinear analysis ③ 714
18.10. Following up loglinear analysis ② 719
18.11. Effect sizes in loglinear analysis ③ 720
18.12. Reporting the results of loglinear analysis ② 721

19 Multilevel linear models 725
19.1. What will this chapter tell me? ① 725
19.2. Hierarchical data ② 726
  19.2.1. The intraclass correlation ② 728
  19.2.2. Benefits of multilevel models ② 729
19.3. Theory of multilevel linear models ③ 730
19.3.1. An example
19.3.2. Fixed and random coefficients

19.4. The multilevel model
19.4.1. Assessing the fit and comparing multilevel models
19.4.2. Types of covariance structures

19.5. Some practical issues
19.5.1. Assumptions
19.5.2. Sample size and power
19.5.3. Centreing variables

19.6. Multilevel modelling on SPSS
19.6.1. Entering the data
19.6.2. Ignoring the data structure: ANOVA
19.6.3. Ignoring the data structure: ANCOVA
19.6.4. Factoring in the data structure: random intercepts
19.6.5. Factoring in the data structure: random intercepts and slopes
19.6.6. Adding an interaction to the model

19.7. Growth models
19.7.1. Growth curves (polynomials)
19.7.2. An example: the honeymoon period
19.7.3. Restructuring the data
19.7.4. Running a growth model on SPSS
19.7.5. Further analysis

19.8. How to report a multilevel model
